Hypha

Hypha: /Noun /ˈhīfə/ each of the branching filaments that make up the mycelium network that coordinates thriving ecosystems.

Hypha builds decentralized tools that help the **world to work 100% for humanity,** in the **shortest possible time,** through **spontaneous cooperation, ecological regeneration** and **equal advantage** for all.
—*Adapted from Bucky Fuller*

V I.IO

WELCOME

This deck explores three offerings - (1) Hypha, the organization, (2) Hypha's core product, the DAO (Decentralized Autonomous Organization) and (3) SEEDS, demonstrating Hypha's products applied to creating Regenerative Economic Systems (#REcon).

HYPHA

EXPLORE

HYPHA DAO

EXPLORE

SEEDS

EXPLORE

3+ YEARS

Using our tools and methods to coordinate a global team of 120+ to build a suite of products, create revenue, and form strategic alliances.

Seizing the opportunity to lead the DAO/Web 3.0 revolution.

We know DAOs*

Being built by a team that's actually been using one full-time to coordinate and distribute resources.

DAOs (decentralized autonomous organizations) are internet-native, global collectives that share resources, build products, make decisions, and work together toward common goals.

More on DAO's?

100's of decentralised decisions

In the first (and still only) DAO to make on-chain, fee-free, and automated governance decisions - deploying millions in value.

Built, tested & iterated

On frameworks for how to DO and BE a DAO (organise in a global and decentralised way) other DAOs and DAO builders are just beginning the journey we've been on for over 3 years.

WE BUILD!

3+ years building, testing and iterating on foundational tools, each a potent product in their own right.

Tools are ready, now is time to accelerate regenerative growth, tell the story, and get the tools out there.

Passport

Co-create, explore, and govern new economic systems.

Wallet

All the basics! Solved the "lost keys crises" of web3 (decentralised key recovery), voting, and much more.

DEX / AMM

Decentralised exchange and auto-market-maker for the Hypha ecosystem.

DAO BUILDER

DAO's for Humans! A flexible framework combining the organisational logic of DAO's, sociocratic principles, and decentralized organising into a hybrid organisation (a DAO).

DAO's provide groups with tools for improving, redesigning and scaling coordination.

Groups can govern and compensate roles, policies, quests, badges, contributions and more.

THE DAWN OF THE DAO

Hypha

"DAOs will transform companies" —Mark Cuban

"The age of DAOs is upon us." —Vitalik Buterin

"An era of DAOplomacy is coming!" —PrimeDAO

"10-K's and 10-Q's are a thing of the past. " —Jack Purdy

"Wyoming Bill to recognize DAOs as companies approved by Senate Committee" —Wyoming State Senate

"Funds under management by DAOs now exceed $1B" —Aaron Wright

"We would be remiss to ignore a now $2T cryptocurrency market." —Steve Cohen

We Build DAO tools

8+ Apps & tools for DAOs.

We Incubate DAO's

3+ and counting, many more shortlisted.

We Build New Economies

New economic systems have come to the free and open-market, we're pioneering the way providing frameworks, tools and resources for communities to organise and scale new economic and governance systems (with a heavy bias towards providing "ethical algorithms" that are intentionally designed for the wellbeing of people and our planet).

In a gold rush, sell **shovels!**

(& prospecting manuals)

5

THE DAO & DHO

Coordination as a Service

DHO = A <u>H</u>olonic DAO for <u>H</u>umans, a world class software platform for decentralized organizations and networks. Architected with disciplined, first principles design that cryptographically guarantees systemic integrity, purpose, and security.

Providing

1. **fee-free, on-chain governance** (only DAO to do so);
2. **treasury management** decentralised and transparent;
3. **diverse compensation tools** (roles, quests, badges & contributions);
4. **dynamic DAO building blocks** that can be remixed to create a multitude of organisation, compensation and governance styles;
5. **regulatory compliance** requirements (for a Wyoming DAO LLC);
6. **tokenization** and decentralized finance (DeFi) for new ventures, contribution accounting and easing the startup journey;
7. **human-centric designs** years of use, exploration, and redesign;
8. **holonic organizational structure & governance** rooted in sociocratic & direct democratic principles;
9. **flexible services**, product pricing, and more.
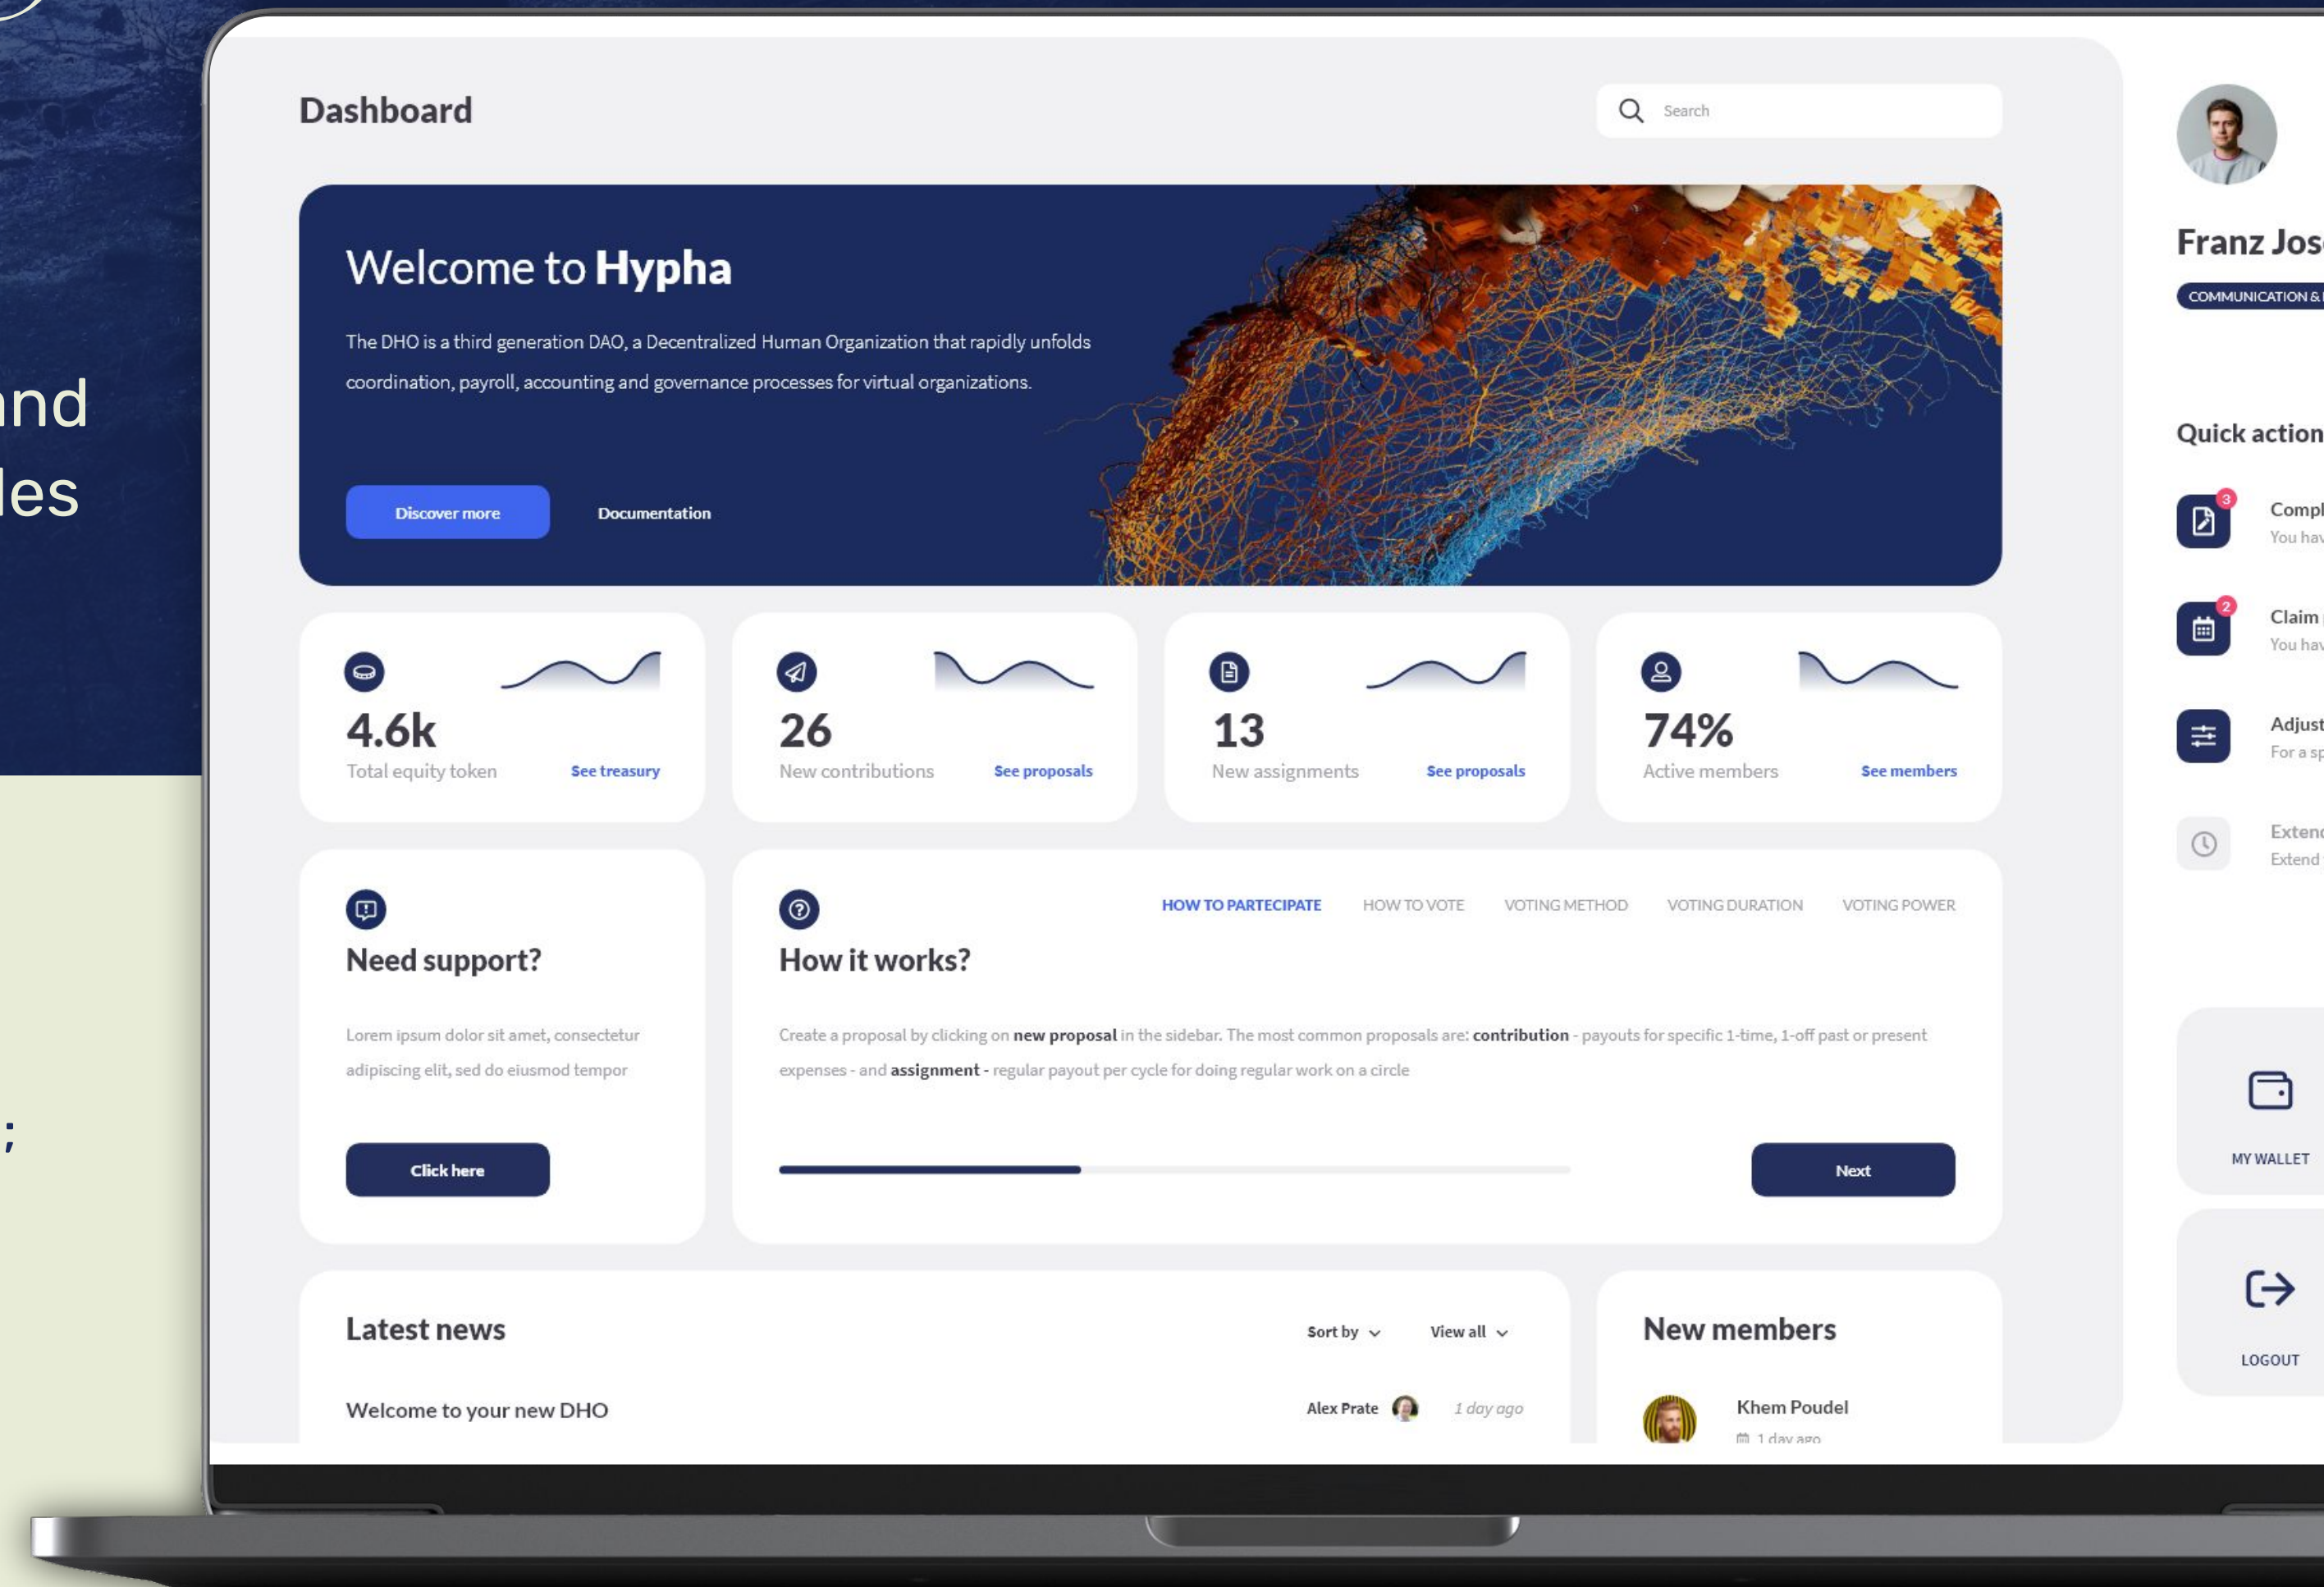

Opportunity to become the "Quickbooks" or "Workday" for next generation of borderless, decentralized organizations!

& MORE!

We create a moat by providing community builders with an ecosystem of zero marginal cost tools.

By necessity we've built tools for solving universal problems in decentralised or complex ecosystems; **helping communities** effectively **onboard, engage** and **grow.**

Providing developers and partner organisations with **toolkits** for easy **integration** within the ecosystem.

Incentivized Social Forum
On chain rewards and reputation for participation in co-creation and governance

Personal Communication Network
Building meaningful relationships in complex ecosystems

Traditional Banking Interface
for decentralised fiat swaps and a trusted (reputation based) peer-2-peer exchange

Stickers, Widgets, Plug-ins and APIs
Easy (< 5 mins) integration tools: on-chain invites, rewards and payments

Ecosystem Authenticator
Single sign-on, secured on-chain signature across a decentralised ecosystem

Blockchain User Experiences
On-chain action monitoring, push notifications, rich queries and data caching

Quest-based rewards
On-chain quests rewarding participation and involvement in the community

Hypha

7

TRACTION

Hypha and SEEDS feature as leading case-studies in international Bestsellers, Blueprints, Podcasts, Global Conferences, and International Events.

8
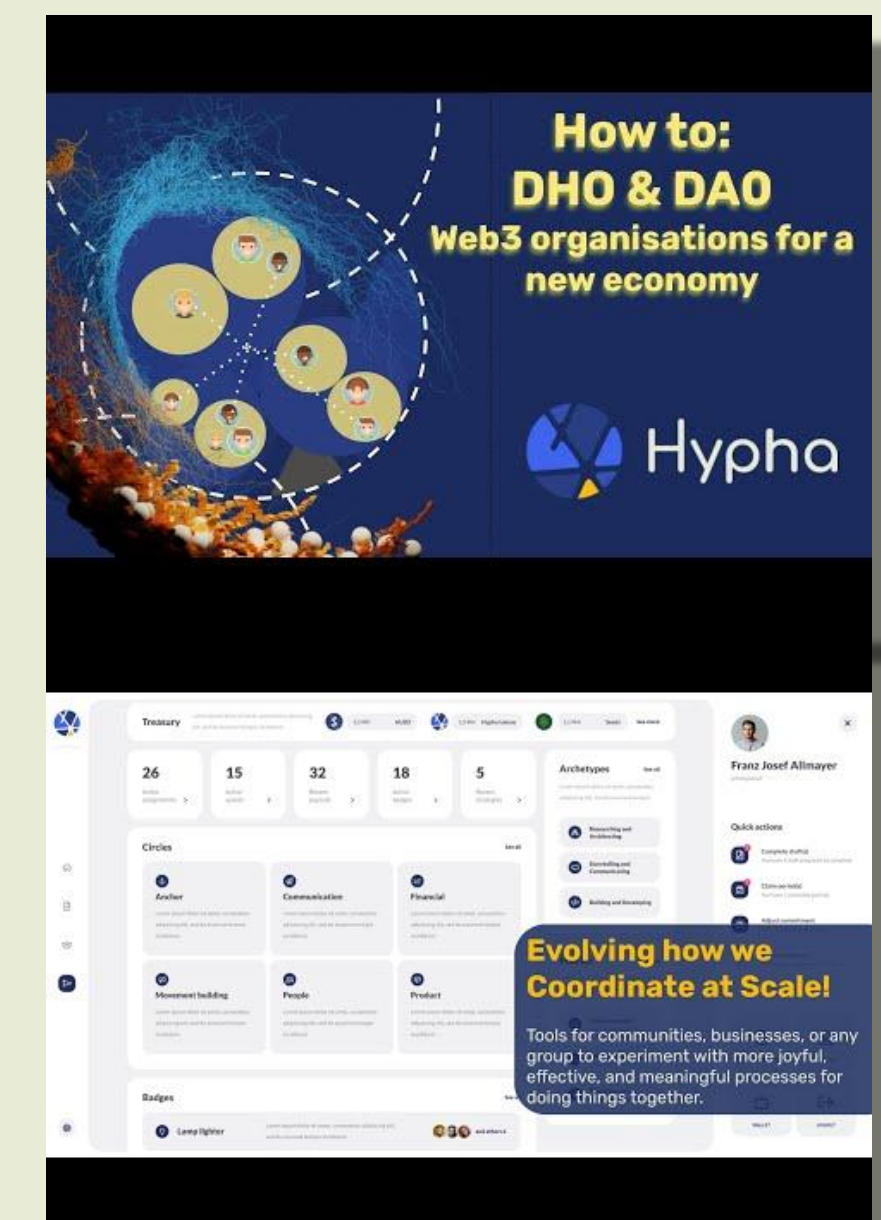

THE TEAM

30+ members and growing.

Highly motivated & committed team with > 50% pay in HYPHA utility token.

Hypha

STRATEGY & COORDINATION • PRODUCT DESIGN & DEVELOPMENT • LEGAL & COMPLIANCE •
FINANCIAL FLOWS • PEOPLE AND HUMAN HEARTBEAT • COMMUNICATION & DESIGN •
MOVEMENT BUILDING

STRATEGIC ANCHOR COUNCIL

CLICK ON PHOTOS FOR MORE INFO

HYPHA UTILITY TOKEN

Basic token economics

Mint

New Hypha utility tokens are only able to be minted using DAO voting, to partially compensate value contributed to the ecosystem and extending the Hypha treasury.

Stake
Lock tokens out of circulation to

Burn
Destroy tokens to

Access

Stake Hypha and unlock access to components from the Hypha Product Suite and fee-free transaction bandwidth.
The more the ecosystem grows and uses Hypha's tools, the more demand to acquire and **stake Hypha out of circulation.**

Earn (DAO Index)

Stake Hypha and earn proportional rewards in the form of incubated projects tokens, rewards, HVoice (Gov. token), and more.

The more valuable the projects incubated by Hypha, the more demand to acquire and **stake Hypha out of circulation.**

Pay for Services

Destroy tokens to pay for:

1. Tx fees above the fee-free limit
2. Using specialty contracts
3. Consulting fees to assist launching DAOs (as needed)
4. Inter-ecosystem platform marketing
5. And more as the ecosystem matures

Hypha

SEIZING THE DAY

01 LOI - Ministry of Agriculture of Peru

To provide DAOs/tools for 1000's of their national coffee and cacao farmer cooperatives for new socio-political engagements.

02 LOI - National Cooperative Business Assoc. (NCBA) in D.C.

To provide DAOs/tools for ~6000 org's in the 19 countries they connect for new socio-economic deployments.

03 Partnerships - GEN, FIC and Numundo

To provide DAOs/tools for 5000+ retreats, ecovillages, communities, farms and more.

04 Current Clients - New Economies

To provide DAOs/tools for new socio-economic systems - such as SEEDS that uses our tools to create and organise regenerative and circular economies.

05 Lake Atitlán Guatemala (DAB)

Co-creating multidisciplinary solutions with all stakeholders to develop regenerative economies that build resilience at the local level.

06 Liechtenstein Energy DHO

Working with the municipalities of the Principality of Liechtenstein to deploy the DHO technology to turbocharge the transformation of the National Energy system.

Hypha

APPENDICES

THE 道 DAO

The 道DAO - The DHO - The Way

道DAO is the process of reality itself, the way things come together, while still transforming. All decisions, contracts and agreements go through the DAO. No single person has the ability to contract the DAO or make agreements without on-chain governance. This is the function of the DAO!

You focus on being & doing rather than "talking". You are present and can detect the energy in the room. You think about longer term impact rather than short term activities. You align with the health (purpose) of the organization rather than being transactional (here and out). You are in service to others, you are doing something for the sake of others.

Decentralized
There is no central leadership, decisions are made in a bottom-up way.

Autonomous
The idea takes on a life of its own, and it's able to incentivize others to make itself happen.

Organization
It can have its own rules, such as how to manage its own funds.

Hypha

WEB 3.0

3.0

1.0

2.0

Why We Exist

Roughly every 20 years, the internet undergoes a radical paradigm shift. After the static web (1980) and the interactive web (2000), we now have entered the third era, called Web3.0.

Unlike the previous eras, this shift provides an evolutionary leap unlike anything we have seen before. It will allow organizations to form and connect in entirely new ways. It will open up and create new ecosystems that anyone with an internet connection can participate in.

This is why we are about to launch the Decentralized Human Organization at the epicenter of this paradigm and mindshift. This is our collective frontier to building organizations together.

While corporations were built for the industrial age, DAOs are built for the information age.

Hypha

DAO 1.0

The DAO Moment

"We have reached a long awaited point in the unfolding evolution of the Bitcoin/blockchain/crypto/Web3 ecosystem: the DAO moment. The timing of this moment is fortunate as we (humanity as a whole) are currently beset by a pantheon of "wicked problems." Problems like ecosystem collapse, the accelerating breakdown of social and political coherence, and the event horizon of exponential technology.

We are not designing an Nth generation messaging app or yet another new way to separate humanity from its soul (I'm looking at you Web2), we are endeavoring something extraordinary. We are trying to innovate an entirely new form of human coordination. And we are doing so in the degeneracy and tyranny of a dying civilization. We need all of the help we can get.

—Jordan Hall (Feb 2022)

What We Offer

- Fee-free, on-chain governance and decision methods that are customized to your needs and can change and evolve over time.
- Compensation based on task complexity that eliminates complicated and outdated HR competency models.
- Large variety in member participation —roles, quests, contributions, badges.
- Simple definition of key organizational assets —circles, policies, expenses, investments.
- Transparent and fraud resistant treasury management and accounting.
- Open architecture to add new modules when available —legal, accounting, trading.

Everything you need to launch your "Organization in a Box"

L   Completeness   H
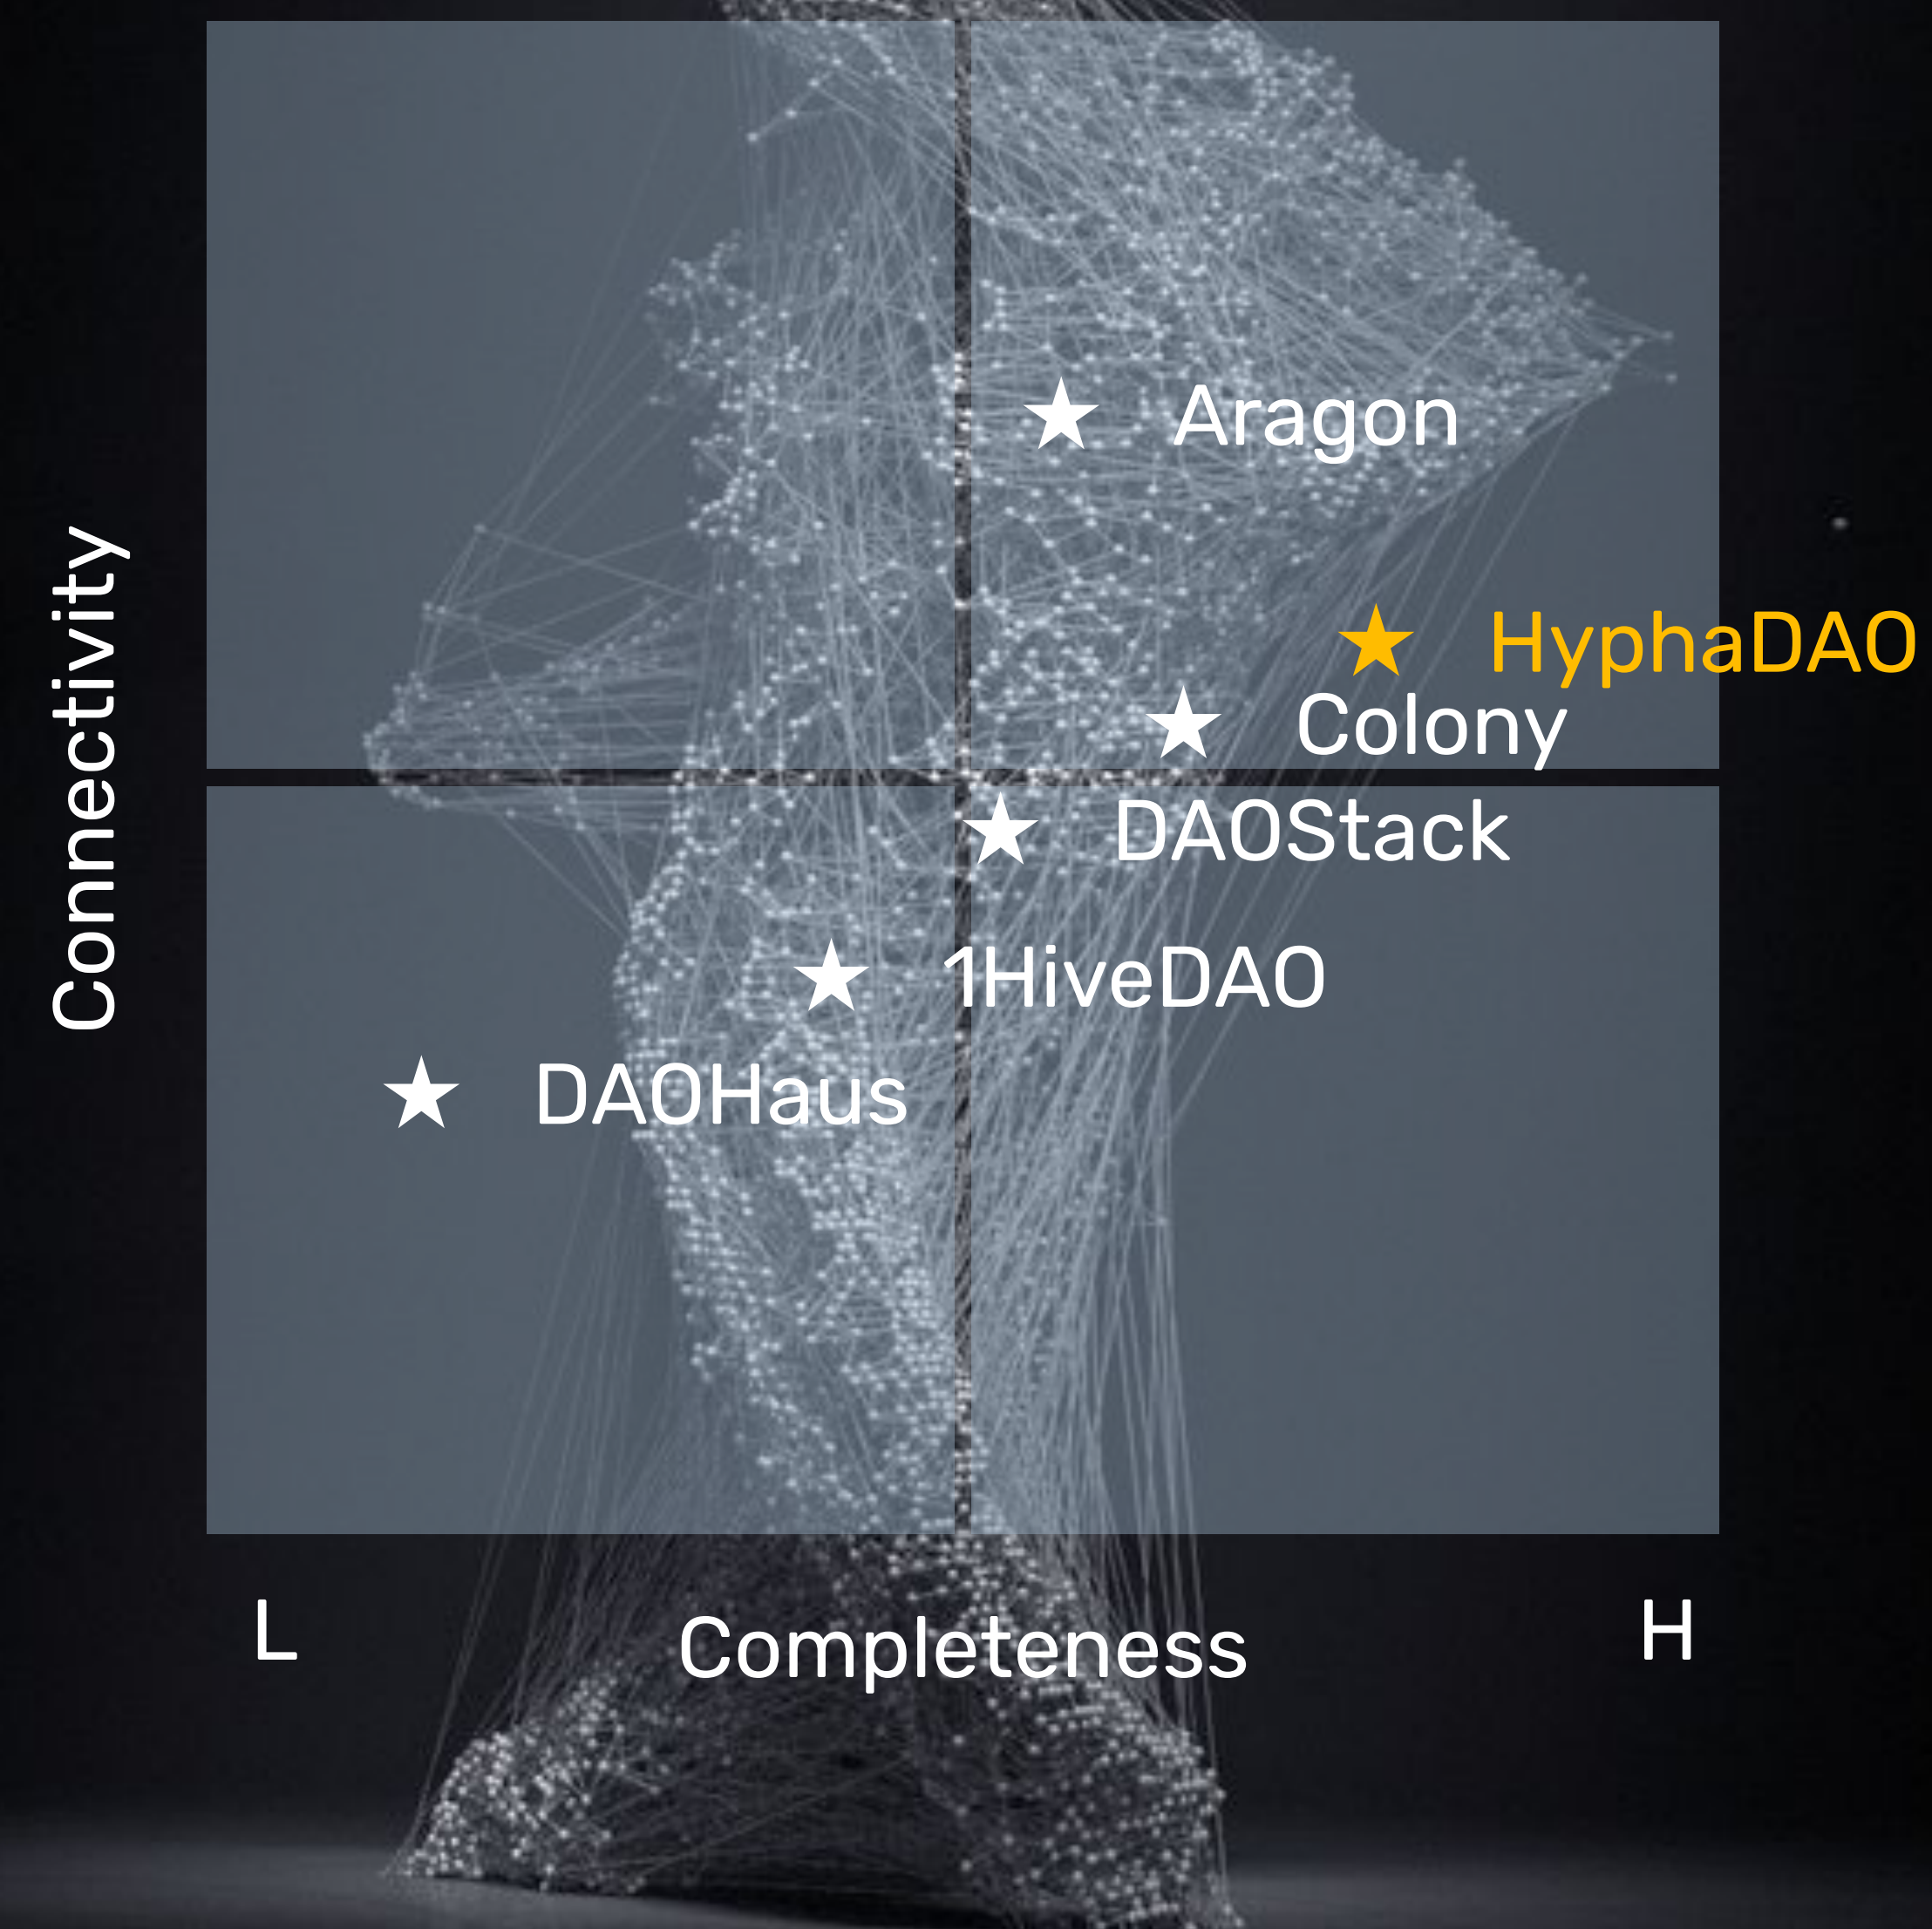

Where We Are Going

- We have the most advanced feature set in the burgeoning DAO industry —from payroll to governance, from contributions to circles.
- We developed a highly innovative UI/UX for notoriously difficult blockchain applications.
- We built the DAO to use the DAO for 3 years (and counting) and made hundreds of key decisions and distributed millions of tokens and system value to our members.
- We embedded an ecosystemic approach to launch new DAOs from within DAOs and transfer the DNA to the next generation.
- We put the human at the center of the DAO, and not solely mechanistic algorithms or clever decision methods devoid of higher purpose.

DAO ECOSYSTEM

DAO's (Decentralised Autonomous Organisations) are transforming the way we organise.

Hypha

- Is an Investment DAO
- Is a DAO SaaS Provider
- Built the SEEDS DAO

We create new futures by bringing new organisational, governance, and economic systems into the world!

FARMER DHO'S

Working with the Ministry of Agriculture in Peru to deploy the DHO technology to provide:

- Org. governance
- Equity/revenue sharing
- Fee-free payments
- Trusted certs (organic, etc.)
- Shipment tracking
- Escrow services, and more

Peru represents 25% of the planet's biodiversity! Supporting clean, **profitable crops** for the 20k Peruvian growers to expand organic agriculture is a planetary necessity

World's largest exporter of (non certified) **organic coffee**, we'll help them prove this and get the value they deserve.

USAid Grant

Specifically designed for Peru initiatives. USAid will match private contributions to Hypha with a floor of $250k, up to $20M, over a 3 yr implementation period.

Hypha

CO-OP DHO'S

Providing cooperatives with:

1. Reduced startup and new membership costs

2. Transparent and more-equitable distribution of governance rights

3. Secure and decentralised treasuries for co-ops & teams within

4. Programmable and automated outcomes & incentives

5. Tokenising voice and equity to provide highly customizable governance and economic structures

6. Reducing friction and coordination costs amongst organisations

Hypha

"WE SUPPORTED 5,330 ORGANIZATIONS INCLUDING 515 COOPERATIVES"

-NCBA (signed LOI), 2019 Report

Building tools to encourage DAO-to-DAO collaboration.

Imagine 1000's of orgs where joint hiring, collaborative projects, shared revenue opportunities were just a few clicks away.

Imagine if adopting other orgs successful policies were as easy as a software update.

VILLAGE DHO'S

New economic and governance systems from the village/neighborhood on up.

Imagine discovering a local restaurant you love and buying their token in a few clicks while still at the table!

Imagine Refugee Camps leapfrogging the 1st world (as Africa did with telecoms) to become the most progressive cities to live in!

Partnerships with GEN, FIC and Numundo
to provide DHOs for 5000+ retreats, ecovillages, communities, farms and more

Atitlán Basin, Guatemala

Hypha

WATCH VIDEO
Highly demanded tool!

CITY DHO'S

New economic and governance systems from the city on up.

Providing tools for mayors and local councils to improve coordination to solve their city's challenges.

Tools so representatives and citizens can directly engage, interact-with and take part in, city governance, policies and budgeting.

Citizens may soon demand their cities provide tools for direct representation and participation!

WATCH VIDEO

Hypha

APPX: HYPHA ADD'L PRODUCTS

The DHO is more than a tool for groups to create new economic systems.

The tools we've already built can be repurposed for a number of applications.

Opportunity to become the "Quickbooks" or "SAP" for next generation of borderless, decentralized organizations!

Hypha

Decentralised & transparent contribution accounting

Decentralised & cheaper docusign

Transparent, quick, & cheap cap-table management

ADDITIONAL VERTICALS & PRODUCTS

SEEDS ECOSYSTEM

Showcasing how many DHOs come together to form a coherent organism capable of operating at a higher order of potential

Much like the difference between the action-potential of a single cell or organ in our body versus the action-potential of ourselves.

When we integrate a whole organism of organisations our ability to act, respond and effect change increases many orders of magnitude - this is the organism's we need to make to respond to humanity's many crises.

Opposed to war and breakdown - **Let's create a Regenerative Renaissance.**

SEEDS CURRENCIES

We have designed a multi-layered currency family and tokenomic system that is connecting all of the dots through three distinct layers.

L1 is a tradeable market currency, L2 is a constant, inflation-adjustable transfer currency, and L3 is a hyper/local community transaction currency. Gateways such as exchanges, liquidity pools or currency bridges exist to enfold all three layers into one coherent system.

Permaculture ecovillage
spaces and self directed
learning.

Zimbabwe
Strong Sharing Economy
and Zimbabwe Circle.

seeds.

Instead of being more profitable

to exploit the natural world

(~5.9 Trillion/yr in subsidies for fossil fuels alone)

we reward the regeneration of our planet.

Using algorithms within the SEEDS platforms, we incentivise and subsidize collaborative and regenerative behaviours and activities for the wellbeing of the whole.

seeds.

Tokens can save us from inflation and systemic theft, fraud, and abuse. #DeFi

Tokens can support new types of financial systems to start driving value towards regeneration. #ReFi

Using tokens we can create altogether new types of economic systems and we can coordinate in more joyful, fulfilling, and regenerative ways.
